PROFESSIONAL EXPERIENCE

End-of-Studies Internship – Macroeconomic Analysis & DSGE Modeling – Banque Centrale de Mauritanie (BCM) February 2026 – May 2026

Nouakchott, Mauritania

- Produced a master's thesis in Econometrics and Applied Statistics comparing monetary regimes in Mauritania using a small open-economy DSGE model.
- Analyzed monetary policy transmission mechanisms, inflation, exchange rate dynamics, and macroeconomic trends in the Mauritanian context.
- Structured macroeconomic and monetary time series from BCM, ANSADE, and international databases for calibration and simulation.
- Contributed to the department's conjunctural analysis, macroeconomic forecasts, and monetary statistics.
- Environment:** Econometrics, DSGE, Python, R, Excel, Julia, GAMS.

Lecturer – Poverty & Household Living Conditions + Sociological Survey Methods – Institut Supérieur des Métiers de la Statistique (ISS) February 2026 – June 2026

Nouakchott, Mauritania

- Taught Poverty and Household Living Conditions module (improved edition).
- Designed and delivered a new module: Sociological Survey Methods (survey methodology, sampling, questionnaire design, data analysis).

End-of-Study Internship – Caisse des Dépôts et de Développement (CDD) February – June 2023

Nouakchott, Mauritania

- Analyzed banking data from CDD to assess the impact of the credit guarantee system on loan defaults in Mauritania.
- Used econometric models and modern machine learning approaches to predict default risks.

Worker Internship – Agence Nationale de la Statistique et de l'Analyse Démographique et Économique (ANSADE) April – June 2022

Nouakchott, Mauritania

- Developed a methodology for data mapping to design sectoral accounts and analysis using ERETES.

PROJECTS

Modeling the Drivers of Mauritania's GDP (ARDL) – Econometric growth modeling

- Econometric modeling of Mauritania's growth dynamics using an ARDL model in R. GitHub.

Poverty & Inequality Forecasting in Mauritania – Poverty indicator forecasts

- Forecasts four key poverty indicators from 1996 to 2030 using survey data and interpolation techniques. GitHub.
