

El Moustpha Cheikh JIDDOU

Data Scientist – ML/Deep Learning Models for Forecasting, NLP and Computer Vision

@elmoustapha.cheikh.jiddou@gmail.com | +22248647376 | Nouakchott, Mauritania |
in El Moustpha Cheikh Jiddou | MoustaphaCheikhJidou | Portfolio |

PROFESSIONAL EXPERIENCE

Data & AI Engineer – Richat Partners

August 2026 – Present

- Nouakchott, Mauritania
- Development of data pipelines and machine learning models to support decision-making in digital transformation, investment, and strategy projects.
- Contribution to the firm's AI offerings: LLM integration, RAG systems, predictive analytics, and data-driven advisory.

Data Systems & IT Architecture Intern – Banque Nationale de Mauritanie (BNM)

February 2025 – Present

- Nouakchott, Mauritania
- Implemented a RAG (Retrieval-Augmented Generation) architecture with PostgreSQL/pgvector to query official banking documentation without data leakage.
- Benchmarked several LLMs (GPT-4o, Claude 3.5, Gemini 1.5, local Llama) to optimize performance and confidentiality.
- Developed sequential neural network models (LSTM, GRU) to anticipate rapid photovoltaic power drops.

Assistant Engineer Intern – Mining & Geotechnical Department – Kinross Gold Corporation (Tasiast)

July 2025 – September 2025

- Tasiast, Mauritania
- PV short-term forecasting: prepared minute-level data (lags, ramps ΔP , time encodings) and prototyped sequential models (LSTM/GRU) to anticipate power drops.

End-of-Study Internship – Caisse des Dépôts et de Développement (CDD)

February – June 2023

- Nouakchott, Mauritania
- Developed computational solutions for risk analysis (logistic regression, k-NN, Random Forest).

PROJECTS

Grain Size Analysis of 316L Microstructure – Computer-vision pipeline for grain boundary analysis

- Computer-vision pipeline segmenting grain boundaries in 316L stainless steel micrographs, comparing thresholding, gradient filters, HED, and a U-Net model. GitHub.

Disaster Tweets NLP Classification – Tweet classification using machine learning

- Developed a machine learning model to classify tweets related to natural disasters, using advanced NLP techniques. GitHub.

RAG-WebSystem – Generative AI system based on Retrieval-Augmented Generation

- End-to-end RAG engine: FAISS semantic search, contextual answer generation, exposed via FastAPI and React. GitHub.

EDUCATION

Higher Polytechnic School of Nouakchott – ESP - Mauritania

October 2023 – June 2026

State Engineer in Statistics and Data Engineering.

Faculty of Economic Sciences and Management – FSEG - Mauritania

October 2023 – June 2025

Master's in Applied Econometrics and Statistics.

SKILLS

PyTorch • TensorFlow • Keras • Python • Deep Learning • NLP • Computer Vision

LANGUAGES

Arabic
Native Language

French
DALF C1

English
CEFR B1

VOLUNTEERING

President, ESP Data Club (January 2023 – April 2025)

CERTIFICATIONS

Google Advanced Data Analytics • DataCamp Data Science in Python • freeCodeCamp Data Analysis with Python
